1   Description

OptiMOS™150V products are class leading power MOSFETs for highest power density and energy efficient solutions. Ultra low gate- and output charges together with lowest on state resistance in small footprint packages make OptiMOS™ 150V the best choice for the demanding requirements of voltage regulator solutions in Solar, Drives, Datacom and Telecom applications. Super fast switching Control FETs together with low EMI Sync FETs provide solutions that are easy to design in. OptiMOS™ products are available in high performance packages to tackle your most challenging applications giving full flexibility in optimizing space- efficiency and cost.

Features

- Optimized for high switching frequency DC/DC converter
- Excellent gate charge x $R_{DS(on)}$ product (FOM)
- Qualified according to JEDEC[1] for target applications
- Pb-free plating; RoHS compliant
- Very low on-resistance $R_{DS(on)}$
- Low profile (<0.7 mm)
- Low parasitic inductance
- Double sided cooling
- Compatible with DirectFET® package MZ footprint and outline[2]
- 100% Rg Tested
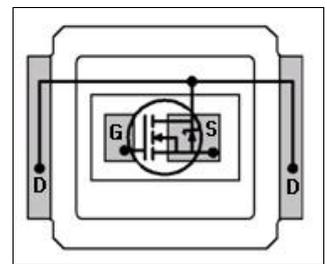

Applications

- Synchronous rectification
- Primary side switches
- Power managment for high performance computing
- High power density point of load converters
