

Features

- Efficiency up to 91%
- 1500VDC Isolation
- Singl/Double output
- Continuous short circuit protection
- Over load protection
- Wide temperature -40 to 85
- Low ripple and noise
- Remote (ON/OFF)
- Wide input voltage rang (4:1)
- Metal case

Design & Feature Considerations

1. Input/Output Ripple Reduction

Reduce output ripple, it is recommended to use capacitors at the input/output. It is recommended to use 10uF~100uF capacitors at the input; 47~220uF capacitors at the output.

2. Overload Protection

The products provide protection against overload, the unit is equipped with internal current limiting circuitry .

3. Remote On/Off

To turn the power module off
Connect REM and -Vin, 0V < Vrem < 1 v, Irem < 1mA;
To turn the power module on
1) Connect REM and +Vin, 30V > Vrem > 5V;
2) REM pin is no connected.

Note

1. All the specifications typical at Ta=+25 resistive load, nominal input voltage and rated output current unless otherwise noted.
2. Operation under no-load conditions will not damage these modules; however they may not meet all specifications listed.
3. Ripple & Noise measurement bandwidth is 0-20MHz.
4. Other input and output voltage may be available, please
5. All DC/DC converters should be externally fused at the front end for protection.
5. Specifications subject to change without notice

Mechanical Dimension & Pin Connections
