## AMED10-GY

DIN Rail

The AMED10-GY is a slim DIN-rail mounting AC/DC converter that offers a cost-effective and energy efficient power supply solution. It has an input voltage range of 90-264VAC and an output voltage range from 5-24V. These converters are fully housed in a plastic case measuring 23.00 x 100.00 x 92.00mm, which has ambient air-cooling vents at both the top and bottom of the converter. This design allows for easy installation and maintenance, offers high power densities and allows you to neatly organize all your electrical components.

This series offers a great operating temperature range from -20°C to 70°C and isolation of 3000VAC for improved reliability and system safety. Furthermore, a high MTBF of 2,834,500h, output over-load protection, output short circuit protection, and output over-voltage protection (OVP) come standard with the series.

The AMED10-GY is suitable for electric distribution boxes, grid power, instrumentation, CNC controllers, industrial control panels, building automation and many more applications.

## Features

- Wide Input: 90 - 264VAC/127 – 370VDC
- Operating Temp: -20 °C to +70 °C
- Isolation voltage: 3000VAC
- Low ripple & noise, 80mV(p-p), 120mV(p-p), 150mV(p-p).
- Short circuit protection, over-voltage protection, and overload protection.
- DC OK Signal Output indication
