AMED150N-GY

DIN Rail

The AMED150N-GY is a DIN rail AC/DC converter that features a cost-effective design. Offering a commercial input voltage range of 90-264VAC and an output voltage range from 12-48V, this series measures 32.00 x 100.50 x 125.00mm. There are ambient air-cooling vents both at the top and bottom of the converter for improved thermal performance. It is also easy to install and remove for maintenance, while efficiently organizing all your electrical cables.

This new series offers great operating temperatures, from -20°C to 70°C and features an isolation of 3000VAC for improved reliability and system safety. Furthermore, a high MTBF of 2,241,280h, output over-load protection, output short circuit protection, over temperature protection (OTP), and output over-voltage protection (OVP) come standard with the series. A built in DC OK relay contact is integrated in the design.

The AMED150N-GY is suitable for electric distribution boxes, grid power, instrumentation, CNC machines, industrial control panels and building automation applications.

Features

- Universal Input: 90 - 264VAC/127 - 370VDC
- Operating Temp: -20 °C to +70 °C
- High isolation voltage: 3000VAC
- Low ripple & noise, 100mV(p-p), 120mV(p-p), 150mV(p-p) max.
- Short circuit protection, over-voltage protection, overload protection, and over-temperature protection
