

**MMC 4543**

BCD-TO-SEVEN SEGMENT LATCH/ DECODER/DRIVER

GENERAL DESCRIPTION

The MMC 4543 BCD-to-7 Segment Latch/Decoder/Driver is designed for use with liquid crystal readouts and is constructed with complementary MOS (CMOS) enhancement-mode devices. The circuit provides the functions of a 4-bit storage latch and a 8421 BCD-to-7 segment decoder and driver. The device has the capability to invert the logic levels of the output combinations. The Phase (Ph), Blanking (Bl), and Latch Disable (LD) inputs are used to reverse the truth-table phase, blank the display, and store a BCD code, respectively. For liquid crystal readouts, a square wave is applied to the Ph input of the circuit and the electrically common back plane of the display. The outputs of the circuit are connected directly to the segments of the readout. For other types of readouts, such as light-emitting diode (LED), incandescent, gas discharge, and fluorescent readouts connections diagrams are given on this data sheet.

FEATURES

- Phase input signal reproduced on outputs for liquid crystal display
- Latched storage of input code
- Blanking input for display intensity modulation
- Readout blanking for illegal input combinations
- Balanced output drive current specifications

APPLICATIONS

Applications include instrument (e.g. counter, DVM, etc.) display driver, computer/calculator display driver, cockpit display driver, and various clock, watch, and timer uses.

ABSOLUTE MAXIMUM RATINGS

V_{DD}^*	Supply voltage: G and H types	-0.5 to	20	V
	E and F types	-0.5 to	18	V
V_i	Input voltage	-0.5 to	$V_{DD} + 0.5$	V
I_i	DC input current (any one input)		± 10	mA
P_{tot}	Total power dissipation (per package)		200	mW
	Dissipation per output transistor for T_A = full package-temperature range		100	mW
T_A	Operating temperature: G and H types	-55 to	125	°C
	E and F types	-40 to	85	°C
T_{stg}	Storage temperature	-65 to	150	°C

* All voltage values are referred to V_{SS} pin voltage

RECOMMENDED OPERATING CONDITIONS

V_{DD}^*	Supply voltage: G and H types	3 to	18	V
	E and F types	3 to	15	V
V_i	Input voltage	0 to	V_{DD}	V
T_A	Operating temperature: G and H types	-55 to	125	°C
	E and F types	-40 to	85	°C
