6-Channel Differential 1:2 Switch for PCIe 3.0 and DisplayPort 1.2

The NCN3612B is a 6-Channel differential SPDT switch designed to route PCI Express Gen3 and/or DisplayPort 1.2 signals. Due to the ultra-low ON-state capacitance (2.1 pF typ) and resistance (8 Ω typ), this switch is ideal for switching high frequency signals up to a signal bit rate (BR) of 8 Gbps. This switch pinout is designed to be used in BTX form factor desktop PCs and is available in a space-saving 5x11x0.75 mm WQFN56 package. The NCN3612B uses 80% less quiescent power than other comparable PCIe switches.
