DESCRIPTION

The SSM70T03 achieves fast switching performance with low gate charge without a complex drive circuit. It is suitable for low voltage applications such as DC/DC converters and general load-switching circuits.

The SSM70T03GH is in a TO-252 package, which is widely used for commercial and industrial surface-mount applications.

The through-hole version, the SSM70T03GJ in TO-251, is available for vertical mounting, where a small footprint is required on the board, and/or an external heatsink is to be attached.

These devices are manufactured with an advanced process, providing improved on-resistance and switching performance. The devices have a maximum junction temperature rating of 175°C for improved thermal margin and reliability.
