

1A Low Dropout Positive Voltage Regulator

General Description

- LD1117A is a three terminal low dropout positive voltage regulator. It provides current limiting and thermal shut down and its circuit includes a trimmed Bandgap reference to assure output voltage accuracy for both fixed output voltage version and adjustable output voltage version. Current limit is trimmed to ensure specified output current and controlled short-circuit current. On-chip thermal shutdown provides protection against any combination of overload and ambient temperature that would create excessive junction temperature
- There are 7 Fixed output voltages :1.2V, 1.5V,1.8V, 2.5V ,2.85V,3.3V an 5.0V. There are also an adjustable version provide output voltage from 1.25V to 12V with 2 external resisitors. They are suitable for applications that required supply current up to 1 A.
- LD1117A series are available in SOT-223 ,SOT-89 ,TO-220,DPAK (TO-252) and D²PAK (TO-263) Packages

SOT-223

SOT-89

TO-220

DPAK

D²PAK

Features

- Input Voltage up to 20V
- Output Current up to 1A
- Low Drop Output Voltage: Typical 1.15V at 1A output current
- Output Voltage Accuracy : $\pm 1\%$ for fixed output Voltage 1.5V,1.8V, 2.5V ,2.85V, 3.3V,5.0V and Adjustable Output Voltage Version. $\pm 2\%$ for fixed output Voltage 1.2V
- Trimmed Current Limit and On-Chip Thermal Shutdown
- Operation Junction Temperature: -40°C to 125°C
- RoHS Compliance and Halogen Free

**HALOGEN
FREE**

Applications

- PC Mother Board
- Graphic Card
- NIC/Switch
- LCD Monitor , DVD Video Player and Printer
- Telecom Equipment and other Peripheral Equipment

LD1117A12/ADJ -LD1117A50/ADJ

Block Diagram

1A Low Dropout Positive Voltage Regulator

LD1117A12/ADJ -LD1117A50/ADJ

Absolute Maximum Ratings

Symbol	Description	Ratings		Unit
V_{IN}	Input Voltage(Note1)	20		V
T_J	Junction Temperature (Note2)	150		° C
T_{STG}	Storage Temperature Range	-65 to 150		° C
$T_{LEAD}(10 \text{ sec})$	Lead Soldering Temperature	260		° C
θ_{JA}	Thermal Resistance (No Heatsink, Note 3)	SOT-223	120	° C/W
		SOT-89	165	
		TO-220	60	
		DPAK	100	
		D2PAK	60	
ESD (Human body model)	ESD	2000		V
ESD (Machine model)	ESD	250		V

Note 1: Input Voltage is recommended operating at 15V max.

Note2 : Operating Junction Temperature is recommended at -40° C to 125° C.

Note3: $P_{D(Max)} = (T_{J(max)} - T_A) / \theta_{JA}$, $P_{D(Max)}$: Maximum Power Dissipation; T_A : Ambient Temperature,

$T_{J(max)}$: Maximum Junction Temperature ; θ_{JA} :The Junction-to Ambient Thermal Resistance.

Exceeding the maximum allowable power dissipation will result in die temperature and the Regulator will go into thermal shutdown
